RE: 2023 FLOWERING RUSH SPRAY

Dear Property Owner:

The City of Monroe's Commission on the Environment, in partnership with the Monroe County Environmental Fund, will be treating the River Raisin adjacent to your property to control the spread of Invasive Plant Species the week of August 28th. Properties in the treatment area will be field marked prior to the application.

Attached to this letter is the treatment notice as required to be provided by the Michigan Department of Environmental Quality, Great Lakes, and Energy (EGLE). Treatment will consist of the application of an environmentally sensitive herbicide, an invasive aquatic plant species management method approved for use in Wayne and Monroe counties through the Detroit River-Western Lake Erie Cooperative Weed Management Area (CWMA), which was established in 2011. Aqua-Weed Control, Inc., a company out of Holly, Michigan, will be treating the permitted length of the river from 3,000' west of the City limits to the dam (Fish Passage #1) behind the Monroe Water Treatment Plant and a small portion along Mason Run drain adjacent to the River Raisin National Battlefield Visitor Center.

Contact the City of Monroe at 734-384-9150 if any questions.

Sincerely,

City of Monroe
